Status

BUILT & VERIFIED VS. REMAINING SETUP

- ✓ Built & tested: scoring, pipeline API, dashboards, offerings + KYC flow, smart-contract test suite
- ✓ Live website rendering offerings + wallet portfolio wiring
- ✓ Restricted-security token + transfer-agent compliance model
- Deploy contracts to Base (testnet first) & paste addresses into app/site
- Add API keys — Formspree, Resend, Twilio, thirdweb
- Select a licensed transfer agent (you act as agent until then)

Tokenized real estate is a regulated security. The compliance registry, KYC gating, and lock-ups are built in; engaging a licensed transfer agent and counsel on the exemption (Reg D / A+ / S) is required before taking investor funds.
